

AQUASTATION

The Independent Remote Monitoring Station

Monitor water quality in remote areas with even fewer site visits using the AquaStation:

- Automated sample collection via pumps
- Take measurements using the integrated AP-7000
- Automatic cleaning of all installed water quality sensors
- Automatically calibrate 4 key parameters
- Self powered (solar/wind)
- Send data via GPRS / 3G for on-line access
- Raise alarms if alarm conditions are met, alert with sms and email
